DEVELOPER UPDATE

Hello Google Play Developer,

We're updating Google Play's [Payments Policy](#) in response to the recent regulatory developments in India. This change means that developers can now offer an alternative billing system alongside Google Play's billing system to users in India making in-app purchases within Play-distributed apps on mobile phones and tablets. Developers have until April 26, 2023 to comply with this updated policy.

Please visit our [Help Center](#) for implementation details and requirements, including instructions for submitting security and customer service verifications, transaction reporting, and user experience requirements so users can make an informed choice.

Thank you,
